OVERVIEW OF SATELLITE DAMAGE ASSESSMENT FOR GORI, GEORGIA

Damage Assessment with WorldView-1 on 19 August 2008

This overview map presents a satellite-based damage assessment for the city of Gori, Georgia following the armed conflict between Georgian and Russian military forces in August 2008. Damaged buildings have been identified with WorldView-1 satellite imagery acquired on 19 August 2008. An estimated total of 33 buildings within the mapped extent of Gori have been classified either as destroyed or severely damaged. Ground sources likely caused by exploding munitions have also been marked. The approximate location of the Georgian train explosion on 24 August has been identified from MODIS satellite detection data. Please note, this is an initial damage assessment and not all damage sites have been independently verified on the ground. Please send additions/corrections to UNOSAT.

Damage Summary for Gori (map extent):
- Total estimate of affected buildings = 33
- Of this number:
  - 17 buildings have likely been destroyed
  - 15 buildings have likely severely damaged

![Map Inset 1]

Severe damages to 3 apartment buildings
