Specifically, 193 structures were categorized in December 2014 and compared with an image acquired by the WorldView-2 satellite on 12 June 2014. Using an image validated in the field. Please send ground feedback to UNITAR / UNOSAT.

This map illustrates satellite-detected damaged structures in Dolores City, East Samar Province, Philippines. Using an image acquired by the WorldView-2 satellite on 12 December 2014 and compared with an image collected on 19 June 2014, UNOSAT identified 991 affected structures in the area. Specifically, 793 structures were categorized as destroyed, 222 as severely damaged and 178 as moderately damaged. Note that due to significant cloud cover present on the post-event image, the north and northwestern parts of the city could not be analyzed. This is a preliminary analysis and has not yet been validated in the field. Please send ground feedback to UNITAR / UNOSAT.
