**Damage Assessment in Northeastern Gaza Strip - Occupied Palestinian Territory**

Analysis with Pleiades Data Acquired 6 July and 25 July 2014

This map illustrates satellite-detected damage and destruction in the northeastern portion of the Gaza Strip, including areas of Gaza City, Toffah, Shj’a, and Shua. Resulting from ongoing violence in the area. Using a satellite image collected 25 July 2014 by the Pleiades satellite, and compared with a pre-crisis Pleiades image collected 6 July 2014, UNOSAT analysis has identified 700 destroyed structures, 316 severely damaged structures, and 102 moderately damaged structures. In addition, 404 craters on roads and in agricultural and non-urbanized areas are also visible as of 25 July 2014. Further analysis will be done as additional imagery is collected. This is a preliminary analysis and has not yet been validated in the field. Please send ground feedback to UNITAR/UNOSAT.

**Legend:**
- Destroyed Structure
- Severely Damaged Structure
- Moderately Damaged Structure
- Impact
- City / Town
- Hospital
- School
- Mosque
- Primary Road
- Secondary Road
