This map illustrates IDP shelter changes within Kismayo as visible in satellite imagery between 14 September 2011 and 10 May 2012. There is little to no change seen on the vast majority of the IDP sites. However, the largest IDP camp west of the city closed. This results in a drop of the estimated number of individual shelter structures to 3,945, compared to 5,025 estimated on 14 September 2011. The total of 24 IDP shelter concentrations occupy an area of approximately 24.1 ha.

This is a preliminary analysis & has not yet been validated in the field. Please send ground feedback to UNITAR / UNOSAT.
