This map illustrates satellite-detected damage to buildings in the village of Benengue and surrounding areas as seen by WorldView-2 satellite imagery collected on 14 May 2014. This damage assessment was conducted in the context of ongoing violence in the Central African Republic. A total of 28 damaged buildings were detected within the area analyzed. In the south of the region there appears to be a cluster of 8 damaged buildings in close proximity to each other. This is a preliminary analysis and has not yet been validated in the field. Please send ground feedback to UNITAR / UNOSAT.
