This map illustrates locations of destroyed structures in Bossangoa, Central African Republic. Using a satellite image acquired 28 February 2014 and compared to imagery from 22 January 2014 and 5 December 2013, UNOSAT reviewed the town of Bossangoa and surrounding areas to locate signs of destroyed structures. A total of 1,234 destroyed structures were located in the area, though structures marked as destroyed on 5 December are classed as "probable" due to the lack of a previous image for comparison. Some of the destruction detected in the 28 February 2014 image was likely a result of burning given the blackened structure remains visible in the imagery. This is a preliminary analysis and has not yet been validated in the field. Please send ground feedback to UNITAR / UNOSAT.

**Destroyed Buildings**
- 05 December 2013 (Probable): 227
- 22 January 2014: 893
- 28 February 2014: 114

**Total Affected:** 1,234

**Map Scale for A3:** 1:20,000

**Satellite Data:** WorldView-2
