This map illustrates the locations of destroyed structures in the Bouar area of Central African Republic as of 4 March 2014. UNOSAT analyzed an image from 22 January 2014 that indicated 396 of the structures shown on the map may have been destroyed. The visible destruction is possibly the result of burning given the blackened structural remains visible in the imagery. This is a preliminary analysis and has not yet been validated in the field. Please send ground feedback to UNITAR/UNOSAT.

Analysis with WorldView-2 Data Acquired 22 January 2014 and 4 March 2014

22 January 2014
Damage Assessment in Bouar, Nana Membe Province, Central African Republic

04 March 2014

Total Affected 506
