Damage Assessment in Maisi town and surroundings

This map illustrates potential satellite-detected damaged structures in Maisi town and the surrounding area in Guantanamo Province, Cuba. The UNITAR-UNOSAT analysis used a Pleiades satellite image, acquired on the 7 October 2016, and identified 417 damaged structures within the map extent; 230 were identified inside the town of Maisi. This is a preliminary analysis and has not yet been validated in the field. Please send ground feedback to UNITAR-UNOSAT.

Legend

- Damaged structure
- Local/Urban road
- Maisi town boundary

230 DAMAGED BUILDINGS WITHIN THE MAISI TOWN BOUNDARY

Map Scale for A3: 1:10,000
