Buildings Damage Assessment of Fiji Museum in Suva City Center, Republic of Fiji.

This map provides an overview of the Fiji Museum in Suva City Center, Republic of Fiji, located at 18°8'58.22"S, 178°25'32.74"E as detected by satellite image acquired after landfall of the Tropical Cyclone Harold-20 on 15 April 2020. UNITAR-UNOSAT analysis used a WorldView-1 image acquired on 15 April 2020 at 13:31 local time and compared it with an image collected on 8 April 2020. The main building structure appears to be intact. The gazebo and the clock tower located in the museum grounds are also undamaged. This is a final analysis that has been validated in the field on 22 April 2020 by UNOSAT-UNITAR.
