This aerial map presents a satellite-based damage assessment for the affected areas between Khachv and Tskhinvali, South Ossetia, Georgia following the armed conflict between Georgian and Russian military forces in August 2008. Damaged buildings have been identified with worldview-1 and formosat-2 satellite imagery acquired on 19 August 2008. A total of 99 buildings have been identified as affected, with 15 buildings likely destroyed, 47 buildings likely severely damaged, and 38 buildings likely damaged. An important preliminary finding of this satellite damage analysis is the observed heavy concentration of damage within clearly defined residential areas. Please note that this is an initial damage assessment and represents an incomplete view of the extent of damage. Damage to other types of structures and infrastructure cannot be accurately assessed from the imagery used. Please send additions/ corrections to the UNOSAT.
