Damage Summary for Buildings in Tkviavi:

- 19 buildings have likely been severely damaged
- 6 buildings have likely been destroyed

Total estimate of affected buildings = 25

Buildings not marked in the map were identified as having no visible damage—this does not mean the buildings are intact. Severely damaged buildings were defined either by the total collapse of the structure or when more than 50% of the roof was missing. Destroyed buildings have been identified with WorldView-1 & Formosat-2 satellite imagery acquired on 19 August 2008.

Additional Imagery: Formosat-2 (2m pansharpened)
