This map presents an overview of temporary shelter locations of displaced civilians in Port-au-Prince and Carrefour, as identified in satellite imagery recorded on 13 January 2010. The locations and categories are shown as green icons (sites 1-8). The map shows the most frequent concentrations, based on the imagery. Locations are commonly situated in open areas away from unstable buildings, in parks, school yards, church compounds and gravel streets of main roads. Four example cases are shown in the imagery. This is a preliminary analysis & has not yet been validated in the field. Please send ground feedback to UNITAR / UNOSAT.

**Site 1: Example of 3 small IDP clusters**

**Site 2: Large IDP cluster in stadium**

**Site 3: IDP cluster in Main Golf Course**

**Site 4: Large IDP cluster in stadium**
