This map illustrates satellite-detected surface waters in Midony-Atsimo District, Atsimo Atsinanana Region, Madagascar as observed from a Sentinel-2 image acquired on 24 February 2022 at 10:00 local time. Within the analyzed area about 1,200 km², a total of about 90 km² of lands appear to be flooded. Based on WorldPop population data and the detected surface waters, about 5,000 people are potentially exposed or living close to flooded areas.

This is a preliminary analysis that has not yet been validated in the field. Please send ground feedback to United Nations Satellite Centre (UNOSAT).
