Damage Assessment

This map illustrates a rapid satellite imagery-based building damage analysis within an area of Gaza and North Gaza Governorates, Gaza Strip, Occupied Palestinian Territory based on an image acquired on 20 May 2021. According to satellite imagery analysis, there are visible 19 impact craters to roads, 318 destroyed or damaged buildings, and 104 areas of possible damage on the road or road-blocking debris. According to publicly available data about 12 health care facilities and more than 40 educational facilities are located within 100 meters of damaged areas and are shown on the map. This is a preliminary analysis and has not yet been quality-controlled or validated in the field. Please send ground feedback to UNITAR.
