GAZA STRIP
OCCUPIED PALESTINIAN TERRITORY

IMAGERY ANALYSIS: 28 May 2021 PUBLISHED: 27 January 2022 V2

Damage Assessment
This map illustrates a satellite imagery-based building damage assessment within the Gaza Strip, Occupied Palestinian Territory, and based on an image collected on 28 May 2021. According to satellite imagery analysis, there are visible 40 impact craters on roads, 454 destroyed or damaged buildings, 249 possibly damaged buildings, 40 damaged greenhouses and 31 areas of possible damage to the road or road-blocking debris. There are also 526 impact craters in fields and barren areas. According to publicly available data about 20 health care facilities and 60 educational facilities are located within 100 meters of damaged areas and are shown on the map. This is a preliminary analysis and has not been validated in the field. Please send ground feedback to UNITAR-UNOSAT.
