This map illustrates satellite-detected surface waters in Lower Shabelle and Middle Shabelle regions of Somalia as observed from a Sentinel-2 image acquired on 30 November 2020 at 10:12 Local time. Within the analyzed area of about 23,000 km², a total of about 500 km² of lands appear to be flooded. Based on WorldPop population data and the detected surface waters, about 40,000 people are potentially exposed or living close to flooded areas.

This is a preliminary analysis and has not yet been validated in the field. Please send ground feedback to UNITAR-UNOSAT.
