This map illustrates satellite-detected damage in a portion of the city of Aleppo, Syrian Arab Republic. Using satellite imagery acquired 01 May 2015, 26 April 2015, 23 May 2015, 23 May 2014, 23 September 2013, and 21 November 2010, UNITAR - UNOSAT identified a total of 5,170 affected structures within the extent of this map. Approximately 13% of these were destroyed, 37% severely damaged, 5% moderately damaged. The city-wide analysis of Aleppo revealed a total of 14,034 affected structures of which 2,878 were destroyed, 6,879 severely damaged, and 4,277 moderately damaged. While much of the city was damaged by 23 May 2014, 5,567 structures were newly damaged and 6,624 structures experienced an increase in damage between that date and 01 May 2015. This analysis was done in the reach initiative for the U.S. Office of Foreign Disaster Assistance and has not yet been validated in the field.

Please send ground feedback to UNITAR - UNOSAT.
