Shelters at Hadalat border crossing, Jordan - Syria border

This map illustrates shelters in the area of the Hadalat crossing on the Syrian-Jordanian border. Using a satellite image collected by the Pleiades satellite on 16 September 2017, UNOSAT located only 189 probable shelters, and most previously identified shelters had been dismantled. This is an 85% decrease in shelters since the previous UNOSAT analysis done using an image collected 19 August 2017. Due to the small size and the irregularity of the shelters it is likely that some shelters may have been missed in this analysis, or some shelters were included erroneously. Due to the scale of this map and the lack of suitable border information at this scale, the border in this map has been excluded. This map is intended for field support and local authorities should be consulted for boundary information. This is a preliminary analysis and has not yet been validated in the field. Please send ground feedback to UNITAR-UNOSAT.
