This map illustrates the drainage network, populated places, and roads in and around Abgadam and Armawaha refugee camp sites in Fongoro District, Sila Region, Chad. The drainage lines identify areas of likely water flow based on certain thresholds of water accumulation and are most likely representative of seasonal streams. Populated places are extracted from the RedEAU research project data library with the latter also the source of the roads data. Populated place names are currently being compiled by UNOSAT. This is a preliminary analysis and has not yet been validated in the field. Please send ground feedback to UNITAR / UNOSAT.

Abgadam and Armawaha Sites:
Latitude: 11.05644 x Longitude: 22.65587

The depiction and use of boundaries, geographic names and related data shown here are not warranted to be error-free nor do they imply official endorsement or acceptance by the United Nations. UNOSAT is a program of the United Nations Institute for Training and Research (UNITAR), providing satellite imagery and related geographic information, research and analysis to UN humanitarian and development agencies and their implementing partners.
