This map illustrates land cover in Fongoro District, Sila Region, Chad and is based on satellite imagery acquired by the SPOT 5 satellite on multiple dates in 2012. Ten different land cover types are indicated on the map and the district is primarily composed of savanna and agricultural areas. Populated place names are currently being compiled by UNOSAT. This is a preliminary analysis and has not yet been validated in the field. Please send ground feedback to UNITAR/UNOSAT.

Abgadam and Armawaha Sites:
Latitude: 11.05644 x Longitude: 22.65587
