Standing flood waters are clearly visible across most sections of flooding within the northern and central sections of Bangkok, with multiple industrial facilities (e.g. concrete production) located along the Western Outer Ring Road (route 9) being severely affected as are main hospitals including Pathum Thani, Muang Pathum, and Krung Siam St. Carlos Medical Centre. Because of affected emergency humanitarian assistance activities in the affected districts following heavy monsoon rains, and has been designed to provide complete coverage here: http://www.unitar.org/unosat/maps/THA.

Duea Ban Wat, Khlong Kha Ban Klang Laem Anamai, Ban Bang Rongrian Anuban Wat Daeng Rongrian Wat Chat Kaeo. Because of affected emergency humanitarian assistance activities in the affected districts following heavy monsoon rains, and has been designed to provide complete coverage here: http://www.unitar.org/unosat/maps/THA.
