This map illustrates the area of Rwamwanja in the Kamwenge District of southwestern Uganda. Rwamwanja is home to both Ugandans and refugees from the neighboring Democratic Republic of the Congo. At UNGSAT's request a commercial high resolution satellite image of the region was collected on 22 May 2013 and UNGSAT identified primary and secondary roads as well as 25,980 structures comprising homes, outbuildings, and larger buildings. Structures are numerous throughout the image with the exception of the densely vegetated southeastern region and certain other areas. This is a preliminary analysis and has not yet been validated in the field. Please send ground feedback to UNITAR / UNOSAT.

The depiction and use of boundaries, geographic names and related data shown here are not warranted to be error-free nor do they imply official endorsement or acceptance by the United Nations. UNOSAT is a program of the United Nations Institute for Training and Research (UNITAR), providing satellite imagery and related geographic information, research and analysis to UN humanitarian and development agencies and their implementing partners.
