This map illustrates new IDP settlements within two kilometers of Afgoye Town as visible in satellite imagery compared to imagery from 30 January 2012. Between these two dates a total of 15 spatially distinct IDP areas appeared in Afgoye Town. These IDP areas cover 32,500 square meters of area in total, with the smallest encompassing 218 square meters and the largest encompassing 17,024 square meters. A total of 3,098 shelters were counted, and shelter sizes generally average about 1.6 meters in width. See Insets 1–3 for illustration. This is a preliminary analysis and has not yet been validated in the field; road data is incomplete due to gaps in the source data. Please send feedback to UNITAR / UNOSAT.
